

RESIDENTIAL TARIFFS FOR PERMANENT RESIDENTS IN A CARAVAN PARK **AMENDED SEPTEMBER 1 2014**

***PARK OPERATORS MUST REFUND RESIDENTS THE CARBON TAX COMPONENT FOR THE CONSUMPTION OF POWER IN JULY AND AUGUST AT 2.4055 CENTS PER UNIT.
THIS MUST BE ITEMISED ON THE NEXT POWER BILL.***

The Public Utilities Office have provided the Association with advice relating to the new Electricity Residential Tariffs that will be ***applicable from SEPTEMBER 1st 2014.***

Please be advised that the new daily rate charges under the A1 Tariff by Park Operators using Synergy or Horizon Power for residents effective July 1 2014 is:

ELECTRICITY CONSUMPTION CHARGE – **24.5961 cents per unit**

The consumption charge is the rate per unit. Park Operators who use either ***Synergy or Horizon Power*** as electricity suppliers are allowed to charge permanent residents up to the quoted Electricity Consumption rate as per the Residential (A1) Tariff, as above.

Park Operators who use ***Alinta and Other Commercial Electricity Providers*** are not restricted to the A1 Residential Tariff and are able to on charge to residents a rate per unit higher than the Residential A1 Tariff. The Association recommend that you charge no more than the amount necessary to recover your costs and use the supplier rate to the park as a guide.

SUPPLY CHARGE – 45.1516 cents per day for the first home (one resident) and 35.0581 per additional home (all other residents)

The ***Supply Charge*** is a fixed daily charge and can be passed on by a Park Operator for every individual resident being charged for electricity in the property. Please note, if a park operator is in an area covered by Synergy, even if the park is not using Synergy as a provider, that the Supply Charge is capped at the Synergy Supply Charge rate.

The Supply Charge is a rate per day charged by the Park Operator for the provision of electricity infrastructure within the park. This means if you send a bill weekly then the calculation is;
Supply Charge of .451516 cents x 7 (seven days) = \$3.16 per week

If there are multiple dwellings (residents' homes) supplied from one master meter (controlled by the Park Operator), the A1 tariff allows the first dwelling to be charged at 45.1516 cents per day and all other dwellings to be charged at 35.0581 cents per day.

SUMMARY

- This information is published in the State Gazette and any park operator is able to charge for this service on either a daily, weekly, monthly or quarterly frequency.
- Park operators **MUST** provide an itemised bill to the resident for electricity charges.
- Park operators using Horizon Power who are charged a rate above the A1 rate are eligible to apply to Horizon Power for the gap between the A1 and A2 and this is paid back by a subsidy from Horizon Power. Please contact Horizon Power directly to apply.
